

Introducing Cameo™ & Cameo™ Pro

Focused Virtual Care. Seamless Connection. Clean Design.

The Cameo Series from Altus is a streamlined, mobile telehealth solution built for clarity, flexibility, and ease of use. With a compact footprint and clean design, each cart integrates a tablet-ready mount, speaker, camera, and cable-managed power system—empowering clinicians to deliver reliable virtual care anywhere it's needed.

Available in two configurations to fit a range of clinical environments:

- Cameo (Standard) – Lightweight and plug-in ready, ideal for stationary setups or areas with convenient power access.
- Cameo Pro – Features an internal power system for extended uptime and mobility—perfect for high-traffic, high-demand care settings.

From outpatient visits to inpatient consults, Cameo enables fast, intuitive virtual encounters with everything clinicians need—and nothing they don't.

Why Cameo?

A Name That Reflects Presence, Clarity, and Care

Cameo was chosen to represent connection that feels personal and purposeful. In virtual care, every interaction matters—and Cameo makes those moments clear, simple, and human.

Much like a cameo appearance brings a meaningful presence to a story, Cameo brings clinicians into the patient's space with focus and immediacy. Whether powered or plug-in, it's a thoughtful balance of function and design—built to keep care close, wherever it happens.

At Altus, we don't just design carts.

We design better ways to connect.

Cameo is how we make virtual care feel personal.

Cameo™

Simple. Mobile. Ready When You Are.

Cameo™ is a streamlined, non-powered telehealth cart designed for flexible, plug-and-play virtual care. Outfitted with a tablet mount, integrated camera, speaker, and cable-managed power strip, it provides everything clinicians need for quick, reliable virtual consultations—without added complexity.

With its lightweight frame and compact footprint, Cameo™ moves easily between rooms or departments—ideal for outpatient clinics, behavioral health, and lower-acuity inpatient settings.

Highlights

- Non-powered, plug-in design
- Smooth mobility with a compact footprint
- Integrated tech-ready features: tablet mount, speaker, camera, and power strip
- Clean cable management and ergonomic design

cameoTM PRO

CameoTM PRO (tablet) **Steady Power. Seamless Care.**

CameoTM Pro builds on the core Cameo design with integrated power and advanced cable management—created for nonstop virtual care during rounds, emergencies, or times of high patient demand. It keeps devices charged, connections stable, and workflows smooth, so clinicians can stay focused on what matters most: patient care.

Engineered for continuous uptime and reliable connectivity, CameoTM Pro is trusted in hospitals, emergency departments, and mobile specialist environments.

Highlights

- Fully integrated power system
- Ideal for high-volume, high-urgency settings
- Same compact footprint with enhanced power capacity
- Supports longer virtual consults and mobile flexibility without tethering

cameoTM PRO

CameoTM PRO (AIO monitor) **Crafted for Care. Powered for Performance.**

CameoTM Pro enhances the core Cameo design with integrated power and advanced cable management—built for the nonstop pace of modern healthcare. In high-traffic settings where virtual care never pauses, it keeps your devices charged, organized, and ready to connect. Designed for continuous uptime and seamless performance, CameoTM Pro delivers reliability clinicians can trust—ideal for hospitals, emergency departments, and mobile specialist care.

Highlights

- Fully integrated power system
- Optimized for high-volume, high-urgency environments
- Same compact footprint with enhanced power capability
- Supports longer consults and mobile flexibility without tethering
