Care Moves. Roll With Altus.

At Altus our goal is to improve how clinicians and staff work. **We manufacture workstations that provide clinicians the ability to offer world-class patient care.**

Clio Workstations

Combining superior mobility with ergonomics, Altus created the **most reliable workstation on wheels**. Clio ensures clinicians have every piece of equipment they need within arm's reach so they can refocus on their patients.

Clinician Focused

Clio workstations consider the most important ergonomic and human factors to facilitate the most comfortable and productivity enhancing workstation possible.

Ergonomic:

- Ascend Lift technology provides up to 18" of height adjustment
- Ascend Electric Lift technology offers height adjustment at the push of a button
- 5.5" of monitor height adjustment and a tilt range of -20°/+10°
- 20" x 16.75" worksurface provides ample space for all equipment and charting needs
- One-piece keyboard pulls-out smoothly with a 0°/-20° tilt
- Soft touch palm support to reduce muscle strain while working

Intuitive:

- LCD monitor has +/- 365 degree swivel to facilitate patient/clinician interaction
- Keyboard and surface light options
- Battery charge level displayed on cart handle and computer monitor
- Locking technology storage area
- Accessory options to customize the workstation to your needs
- Different caster options for different flooring types and needs

IT's Preferred Choice

- Ships fully assembled
- Corrosion resistant shrouded casters keep the wheels clean and rolling smooth
- Small base footprint (18.5" W x 21.5"D) is user-friendly in tight spaces
- Center column and base design optimize center of gravity, reducing push/pull force
- A large portfolio of service and warranty programs putting time back into your day
- Battery charge lasts an entire shift and recharges quickly

Power

- **Safe:** ClioAir's lightweight performance LiFePO₄ (Lithium Iron Phosphate) battery technology weighs less, lasts longer, and charges more efficiently compared to other batteries
- **Uninterrupted workflows:** Power for an entire shift without needing to recharge. When it's time to charge, clinicians can work while it charges and can unplug it on average within 2 hours

MPMView Software

- All Clio carts come with **Clinician View** to quickly see the remaining power supply in hours
- Take full control with our **Fleet View** for diagnostics and predictive analytics for entire workstation fleets all in one central location

Ascend Sit-to-Stand Lift Technology

- Using a manual lever, access 18' range of height adjustability fostering an ergonomic view of the computer
- Accommodates a wide range of clinician and caregiver heights (from 5th - 95th percentile)

Ascend EL Sit-to-Stand Electric Lift Technology

- **Fast:** Ascend Electric Lift is 47% faster than leading computer cart electric lifts
- **Powerful:** Ascend Electric Lift is 52% stronger. Total max dynamic load of 270lbs vs 178lbs. from leading computer cart electric lifts
- **Reliable:** Simplistic design with an expected life of 10,000 up/down cycles
